

**Savage Arms 2003**

*The  
Definition  
of  
Accuracy*

# Dear Valued Customer

## SAVAGE ARMS IS CHANGING THE RULES!

While our firearms have enjoyed exceptional support and accolades for the "most accurate out of the box" production rifles made in the USA, we continue to strive for perfection.

Factory firearms invariably suffer from the same consumer complaint – heavy triggers!

For 2003, Savage is proud to introduce the first fully adjustable trigger system that does not require professional gunsmith attention. Called the AccuTrigger™, it is the first of its kind in the industry and gives the shooter finite control of the trigger-pull settings.

When coupled with new short magnum cartridges, new camo stocks and innovative product features, Savage Arms is setting new standards for others to follow.

In short, the Savage tradition of excellence.

For Savage Arms,

Ronald Coburn  
Chairman & CEO

As part of our commitment to bring you the best products possible, Savage Arms, Inc. reserves the right to change materials and/or specifications without notification.

Savage rifles are widely acclaimed as the most accurate out-of-the-box rifles available. This is attributed to a unique blend of features including a free-floating, button-rifled heavy barrel with a target style recessed

*Savage rifles  
provide unsurpassed  
accuracy at  
an unbeatable value.*

### 3 - POSITION SAFETY

All Savage rifles with the new AccuTrigger™ feature a newly designed teardrop 3-position safety that provides better acquisition of the safety button and operates smoother and quieter.

### DUAL PILLAR BEDDING

Pillar Bedding is used to enhance accuracy by providing maximum stability for the action. "Dual Pillar" bedding is accomplished by permanently embedding two steel pillars in the stock. Front and rear action screws are inserted through the two pillar sleeves into the receiver to provide steel-to-steel contact points.

## Introducing the new SAVAGE ACCUTRIGGER™

A revolutionary design that will forever change the way shooters expect triggers to function.

Savage is constantly searching for new products or innovations that provide a true benefit to shooters. The trigger is one significant area that captured Savage's attention. Most triggers found in firearms produced today have a very heavy pull. The reason is quite simple... liability. Manufacturers cannot afford to ship firearms with triggers that could accidentally discharge; therefore, they design their firearms with heavy trigger pulls.

Almost all triggers can be adjusted to some degree. Some triggers have a screw that can be adjusted in order to reduce spring pressure on the sear mechanism, while others require a gunsmith to polish the mating components to reduce sear engagement. Adjustments to a factory trigger can create an unsafe condition and will usually void the factory warranty.

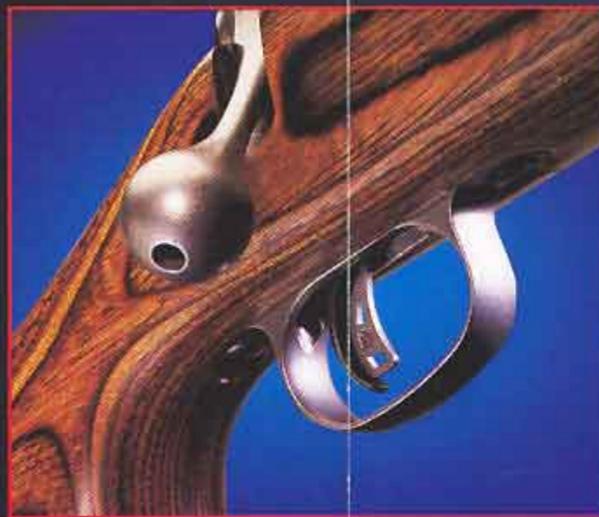

Savage challenged its engineering team to design a completely new trigger system that would give shooters what they desired. The parameters of this new trigger system, as outlined below, were formidable:

- *Infinitely adjustable*
- *Trigger pull between 1-1/2 lbs. and 6 lbs.*
- *Capable of being adjusted by the owner*
- *Completely safe – no danger of accidental discharge even at the lowest setting*
- *Crisp release with no creep*

It took several years, but Savage's new AccuTrigger™ meets every objective.

The AccuTrigger™ can be adjusted from a minimum of 1-1/2 lbs. to a maximum of 6 lbs. The shooter is able to set the trigger pull to suit his or her individual preference. There should be no need to take the rifle to a gunsmith to have the trigger adjusted.

To adjust the trigger, you simply remove the stock and rotate the trigger return spring with

the tool that is supplied with the rifle. The AccuTrigger™ has a single adjustment location and is designed so it cannot be adjusted below 1-1/2 lbs.

The AccuTrigger™ is completely safe and cannot accidentally discharge during normal use from being jarred or dropped when maintained and adjusted as intended. The trigger is designed with an integrated AccuRelease™ that must be completely depressed or the rifle cannot fire.

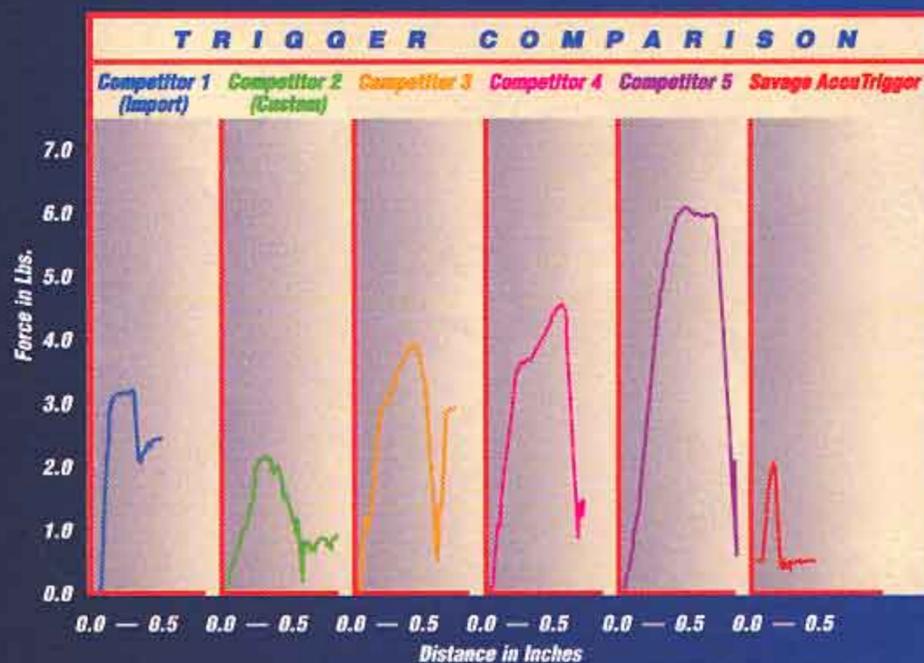

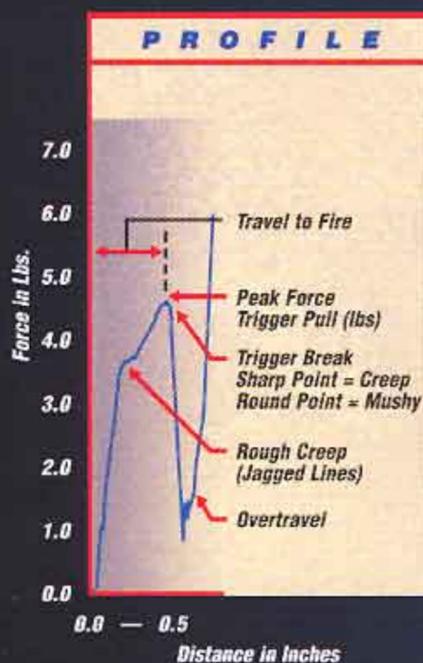

When the AccuRelease™ is intentionally depressed while pulling the trigger, the rifle will discharge because the sear is no longer blocked. You'll find the AccuTrigger™ is extremely crisp and exhibits negligible creep.

Savage used sophisticated software to compare objective measurements of their new AccuTrigger™ with competitors' triggers. These comparisons confirmed there is a graphic and repeatable difference between the AccuTrigger™ and all other triggers tested. This objective method of testing demonstrated the new Savage system has a lighter trigger pull than all the other major brands. In fact, the AccuTrigger™ was lighter than a top-of-the-line imported brand and a custom aftermarket trigger. Testing also revealed the AccuTrigger™ was much smoother, crisper, broke cleaner and demonstrated less creep than any other factory-built trigger tested.

An additional advantage shooters will find on rifles with the new system is a newly designed teardrop safety that provides better acquisition of the safety button. This new safety also operates smoother and quieter.

The new AccuTrigger™ will be available on all Varmint, LE and heavy barrel long range rifles beginning in January, 2003.

See and use the future of the industry – the Savage trigger system that makes all others obsolete.

crown and dual pillar bedding which is typically found only on custom rifles.

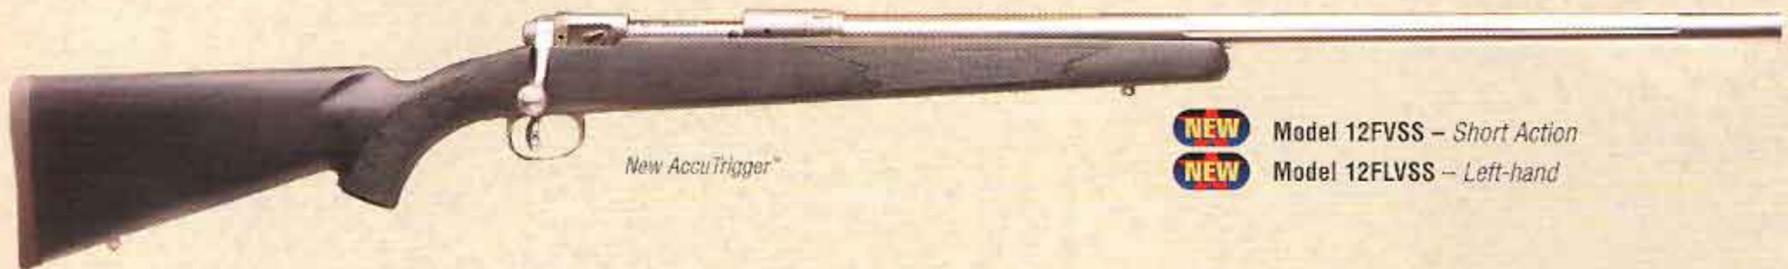

Savage is introducing single shot models for 2003 and the varmint package model is available with a

Burris 6-18x37mm scope packed in a rugged aluminum case. Savage's new AccuTrigger™ will be a standard feature in all varmint rifles for 2003.

## MUZZLELOADER SERIES

Smokeless Powder, Black Powder or Pyrodex – you choose the propellant! The bolt-action Model 10ML-II is the only muzzleloader to give you that choice. It's also the only .50 caliber muzzleloading big game rifle capable of producing velocities exceeding 2,300 f.p.s., delivering more than 3,000 ft. lbs. of knockdown power. The Model

10ML-II is capable of 1½" groups at 100 yards. Plus, by using smokeless powder this unique muzzleloader is practically maintenance-free without the messy clean-up normally associated with black powder.

The Model 10ML-II now offers several stock options – black synthetic, Realtree Hardwoods® HD™ camouflage synthetic or brown laminate. Depending on model

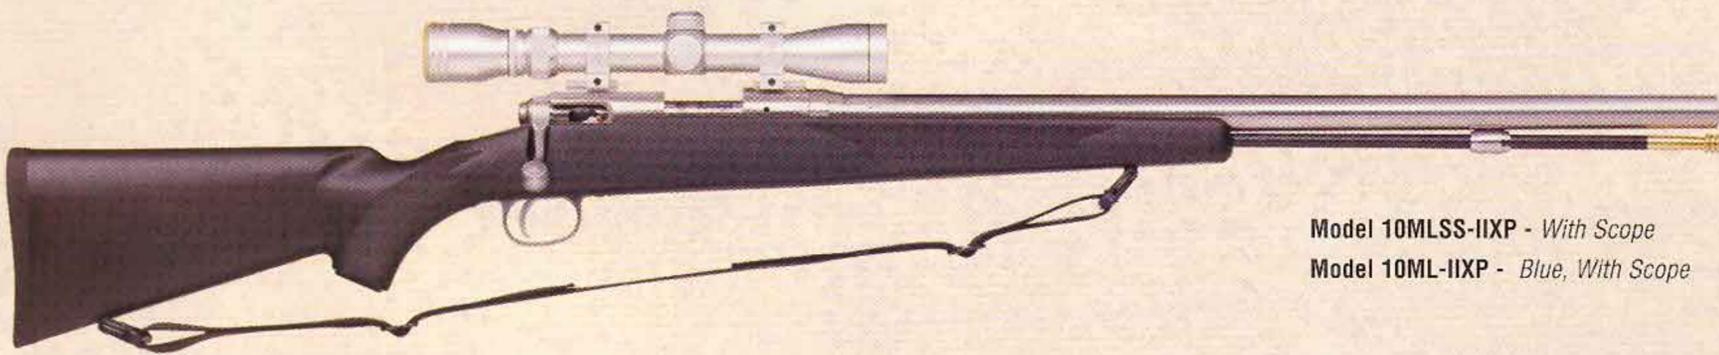

*The 10ML-II delivers high performance,  
unparalleled accuracy  
and is practically maintenance free.*

variation, the 24" barrel and receiver are available in choice of blued or stainless steel. Features include "easy-to-prime" hot No. 209 primer ignition, patented removable breech plug and vent liner, a receiver that is drilled and tapped for easy scope installation and adjustable fiber-optic hunting sights.

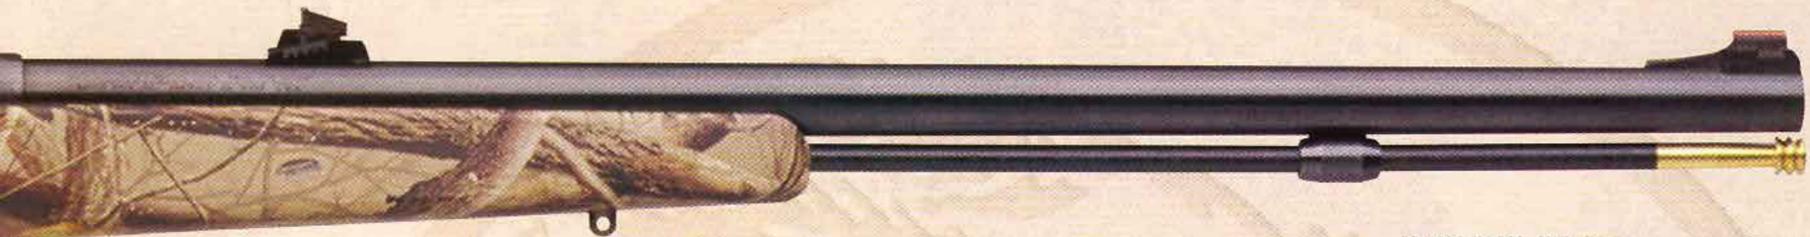

**A C C E S S O R Y   K I T**

Accessory Kit contains: 5 Powder Vials, 2 Vent Liners, Vent Liner Pick, Powder Dippers, 20 Hornady Bullets, 20 MMP Sabots (packed with bullets), Gun Cleaning Patches, TW25 B High Tech Lube, .50 Cal. Cotton Bore Mop, and .50 Cal. Bronze Bore Brush.

DO NOT use smokeless powder in any other muzzleloading firearm unless expressly recommended to do so by the manufacturer.

**SAFETY TIP**  *Never transport a loaded firearm.*

## ULTRA LIGHT AND CLASSIC SERIES

Need a fast handling lightweight rifle for those special out of the way hunting situations? The Savage Scout incorporates a 20" barrel using a rear mounted ghost ring sight with a gold bead front sight. Ideal for long eye-relief scope mounting, this rifle excels in rough terrain or dense cover situations.

Hunting the high country and want a super accurate six pound rifle to meet the challenge – check out the Savage Sierra. Sporting a 20" barrel and rugged synthetic stock, you can carry this rifle all day and still be ready for more.

Discriminating hunters immediately appreciate the level of quality and refinement built into the Savage Classic

### L A S E R - E T C H E D B O L T S

# .22 LR RIMFIRE SERIES

For many of us, our first experience with the shooting sports was when Dad or maybe a favorite uncle let us shoot his .22 rifle. Savage understands that first shot was special and why for over a century, our rimfire rifles have been part of the American shooting tradition. The

Model 64GXP

Model 64FV

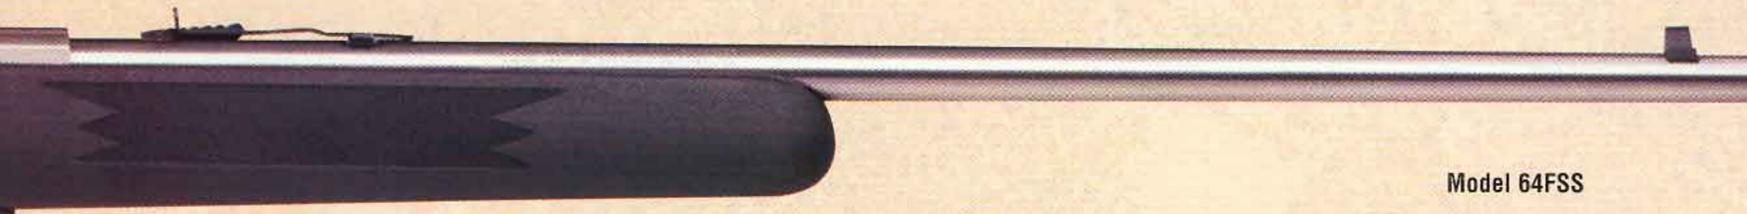

casual plinker can perfect his or her abilities with our semi-auto Model 64, while the serious marksman can hit the bullseye every time, with the 64FV heavy barrel model. Available in either blued or stainless finishes and with hardwood or black synthetic stocks, they can handle any

shooting challenge. There are also two package models to choose from, each comes complete with scope and rings. The Savage .22LR Series, the only name you need to know in rimfire shooting.

*Rimfire rifles in .22 LR add more fun to your shooting than almost anything else for the money.*

# MAGNUM RIMFIRE SERIES

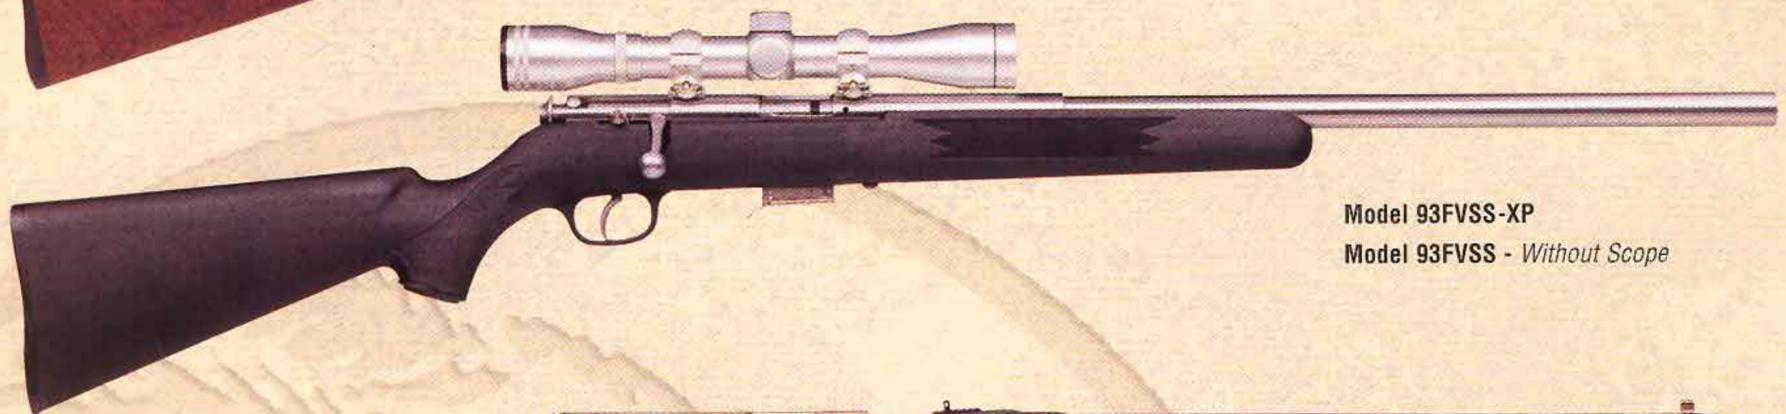

Want magnum capabilities in your .22 shooting? Take a close look at the Savage Model 93 Series. It offers the shooter a complete line-up of .22WMR bolt-action rifles ideal for longer-range shots on varmints or game, that standard .22LR ammo can't match. You can choose between walnut finished hardwood or black synthetic stocks. Finishes include stainless and blued models, open sights with the rear adjustable, are

standard, while fiber optic sights come on the stainless sporter model. And for the ultimate in tack driving accuracy, try the Model 93 FVSS-XP, that features a stainless steel heavy target grade barrel complete with scope and mounts. A traditional choice is the Stevens "Favorite". This classic falling block rifle offers a full octagon barrel with walnut stained hardwood stock and forend in a lever-action single shot rifle.

*Fans of the .22 WMR will find a Savage rifle to meet their specific needs, no matter how diverse.*

Many instructors feel the single shot action is the perfect rifle for beginners, due to the inherent safety of “one round at a time” shooting. Savage offers the most extensive array of single shot models including youth models with a camo stock just like dad’s. Traditional shooters have fallen in love with the modern revival of the classic falling block Stevens Favorite. The new for 2003 Cub model is a mini youth

version featuring a conventional bolt-action with a traditional safety. Generations of young shooters learned what fun safe shooting is with a Savage or Stevens .22. Now the next generation can too.

*The Savage single shot action is often thought of as the perfect rifle for beginners.*

# .17 HORNADY SERIES

The new .17 Hornady Magnum Rimfire cartridge is the perfect match with Savage rifles that are widely acclaimed for their accuracy and value. The .17 Magnum Rimfire cartridge is ideal for plinking and varmint shooting.

It delivers a velocity of 2,550 fps., more than 25% faster than the .22 Magnum.

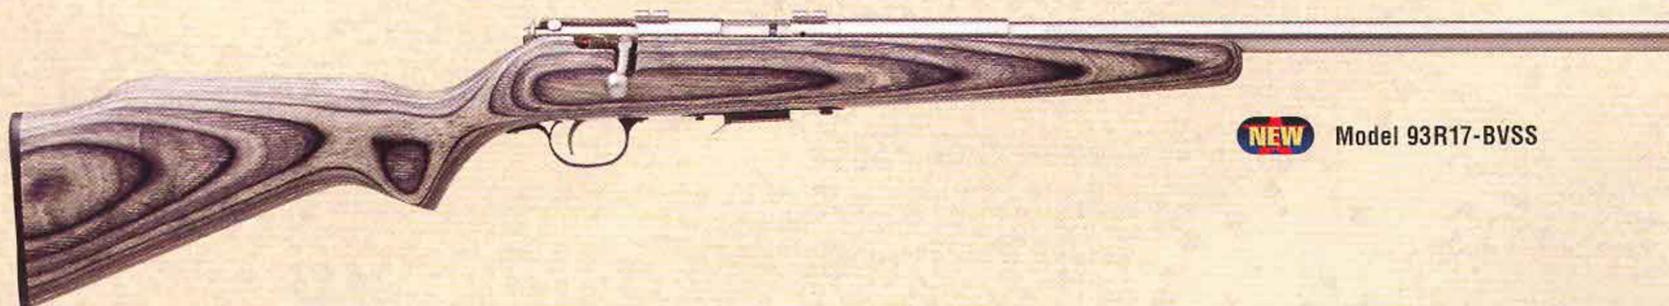

Savage continues to demonstrate its leadership role in

the rimfire market with the introduction of a complete series of rifles chambered for the .17HMR. This diverse line-up includes heavy varmint barrel and sporter barrel models; stainless and blue; wood, synthetic, laminated and camo stocks; bolt-action, falling block and handgun models; right and left hand. Truly, a remarkable array of models to suit every shooter's needs.
